

## mt4client™

### The machine translation solution from KERN

Why use a public machine translation tool such as DeepL, Google and so on when you can use the tailored, neuronal solution from KERN?

The machine-translation solution **MT4client™** from KERN is based on the latest developments in artificial intelligence and hybrid

technology (rule-based, statistical and neuronal). The machine translation system (MTS) is tailored to the individual needs of our customers, which enables much better results to be achieved than with the usual translation tools that are freely available online.

### An overview of KERN's machine services

- **Machine Learning** The system can be trained according to different rules, so that individual requirements can be taken into consideration and implemented. We optimise the MT system at regular intervals in that we use the results from corrected translations. In this way the software is trained on certain text types or specialist topics. Additionally, **MT4client™** offers the possibility of integrating termbases.
- **Security:** With the use of **MT4client™**, we can guarantee absolutely secure handling of your data, which is not made available to third parties at any time. The machine solution functions in our **own data centre** at KERN in **Germany**.
- **Quality:** With **MT4client™**, we offer our clients a solution which belongs to the newest generations of MT solutions and as a result delivers quality translations. We ensure the quality of translations with **post-editing** of machine-translated texts and texts translated by **MT4client™**, plus other MT systems such as DeepL or Google Translate.
- **Connections:** Connection to our portal solution **portal4client™ Advanced** is possible, meaning that we can guarantee (cost) efficient and clearly organised translation management, also when using our MT solution.

### Mt4client™ offers you:

- 💡 **Machine Learning:** Through the teaching of various rules, individual requirements can be taken into consideration and implemented.
- 🔒 **Security:** Secure handling of your data, which is not made available to third parties at any time.
- 🔧 **Quality:** Newest generation of MT systems delivers quality translations. Quality guaranteed by post-editing of machine translated texts.
- 🔌 **Connections:** Connection to our portal solution **portal4client™ Advanced**, meaning that (cost) efficient translation management is guaranteed.

Have we sparked your interest and do you want to know more about a possible implementation of **MT4client™** in combination with TM systems? We would be happy to advise you comprehensively on this topic and find out together whether machine translations are the right option for you.
